Understanding World Sporting Pro/Handicap shoot system.

Quick Guide

How you Win

Simply all you need to do is concentrate on your shooting, maintain or improve your standard of shooting and you are likely to be in the prize fund payout.

Handicap System

Once you have completed three shoots you will have a True handicap taken as an average of your last three scores.

Even on your first shoot you are given a handicap based on selected unknown stands.

After completing your **first shoot** you will be given a handicap based on your score +shots* added.

After completing your **second shoot** your handicap will be updated, both scores being added together and divided by 2 + shots* added.

On completion of your **third shoot** your handicap will be your true average of your last three scores.

* Shooters with only one score posted have shots added to their score for first handicap.

Shooters with two scores posted have less shots added, scores are added together and divided by 2.

Once three scores are posted your handicap is a true average as examples show below.

Example 100 bird event – Par 90 ex 100

Shoot **72** ex **100** latest score

Shoot **80** ex **100**

Shoot **76** ex **100**

Total 228 ÷ 3 = 76

you will have a handicap of **+14** for your next shoot. $14 + 76 = 90$

Decrease Handicap

If you shoot better your handicap will decrease.

Shoot **82** ex **100** latest score

Shoot **72** ex **100**

Shoot **80** ex **100**

Total 234 ÷ 3 = 78

you will have a handicap of **+12** for your next shoot. $12 + 78 = 90$

Increase Handicap

Your handicap will increase if you shoot worse

Shoot **58** ex **100** latest score

Shoot **72** ex **100**

Shoot **80** ex **100**

Total 210 ÷ 3 = 70

you will have a handicap of **+20** for your next shoot. $20 + 70 = 90$

Max handicap +30 (all scores 60 and below +30)

Min Handicap 0 (all scores 90 and above +0)

Handicaps updated weekly ([check your handicap](#))

(if you shoot two shoots within a week same handicap will be used.)

If you join and shoot two shoots within first week you will be assessed on unknown stands to give you a handicap for day as at your first shoot.

To book on you should always know your membership no. This is on your membership card or slip. If you have lost your card make a note of your number on something you always carry when attending a shoot.

[Check your Number here.](#)

Prize Fund Payout

The prize fund is paid out in **two levels** plus the remaining prize fund share and is up to the

ground owner how the money is shared out.

First Level No Handicap added High gun + places

Second Level Handicap added High gun + places

Prize Fund Share Share of remaining prize fund across both levels

[Click here to see result sheet example of payout.](#)

One prize per person / all shooters compete in both levels regardless of handicap.

Other Ways to Use your Handicap

Once you understand the way the handicap system works you can have even more fun at a shoot.

Chances are you shoot regularly with a group of friends, using the pro/handicap system you can have your own competition separate from the prize fund being offered at the shoot.

You may decide to all put a fiver in the pot for the winner or the loser buys a round of drinks etc.

Example of a group of four mates

Shooter 1	Handicap +20	Shoots 67	Total = 87
Shooter 2	Handicap +0	Shoots 88	Total = 88
Shooter 3	Handicap +2	Shoots 85	Total = 87
Shooter 4	Handicap +15	Shoots 74	Total = 89

Give this a try, you will be amazed how close you end up with your score plus handicap making it a great equalizer between friends enabling anyone to win.

Most importantly enjoy your shooting !!!
