

World Sporting – Quick Guide

www.worldsporting.net

Understanding World Sporting Pro/Handicap shoot system.

Quick Guide

How you Win

Simply all you need to do is concentrate on your shooting, maintain or improve your standard of shooting and you are likely to be in the prize fund payout.

Handicap System

Even on your first shoot you are given a handicap based on selected unknown stands.

After completing your first shoot you have a true handicap.

Example 100 bird event – Shoot **70** ex **100** you will have a handicap of +20 for your next shoot. (par for 100 bird events = 90 ex 100)

To learn more about the pro/handicap and par system

<http://www.worldsporting.net/handicapsystem/pro-handicap-shoot-system.php>

Decrease Handicap

If you shoot better your handicap will decrease. Example based on handicap above, you shoot **72** ex **100** at next shoot then you will have a new handicap of +18.

Increase Handicap

Your handicap will increase if you shoot three scores worse than your previous best. The system looks back at your last three scores and bases your handicap according to the highest.

Example of your first 12 shoots (first shoot left- Max handicap +30)

Shoot	70	68	69	67	65	64	62	71	72	69	68	68
Handicap	20	20	20	21	21	23	25	19	18	18	18	21

Handicaps updated once a week

http://www.worldsporting.co.uk/database1_interface/Results/results_page.asp
if you shoot two shoots within a week same handicap will be used.)

If you join and shoot two shoots within first week you will be assessed on unknown stands to give you a handicap for day as at your first shoot.

To book on you should always know your membership no. This is on your membership card. If you have lost your card make a note of your number on something you always carry when attending a shoot.

Prize Fund Payout

The prize fund is paid out in three levels and is up to the ground owner how the money is shared out.

First Level	No Handicap added	High gun + places
Second Level	Handicap added	High gun + places
Third Level	Share of remaining prize fund.	

<http://www.worldsporting.net/results/UK/orstonscoresheets/110227.php>

One prize per person / all shooters compete in all levels regardless of handicap.

Other Ways to Use your Handicap

Once you understand the way the handicap system works you can have even more fun at a shoot.

Chances are you shoot regularly with a group of friends, using the pro/handicap system you can have your own competition separate from the prize fund being offered at the shoot.

You may decide to all put a fiver in the pot for the winner or the loser buys a round of drinks etc.

Example of a group of four mates

Shooter 1	Handicap +20	Shoots 67	Total = 87
Shooter 2	Handicap +0	Shoots 88	Total = 88
Shooter 3	Handicap +2	Shoots 85	Total = 87
Shooter 4	Handicap +15	Shoots 74	Total = 89

Give this a try, you will be amazed how close you end up with your score plus handicap making it a great equalizer between friends enabling anyone to win.

Most importantly enjoy your shooting !!!
